
Radiodetection - RD312 Metallic Cover Locator

The RD312 locator sets a new standard of simplicity and dependability for finding valve box covers, vault covers and manhole covers lost under blacktop, concrete or grass verges.

The RD312 locator reduces time wasted looking for lost covers and is the right choice for speeding up site work and achieving fast payback.

The RD312 automatically adjusts its sensitivity to suit its present environment. It can be used near metal fences and even under parked cars, with no loss of accuracy.

The range of facilities includes:

- Easy two button operation, On/reset and Off
- Automatic sensitivity adjustment for peak performance
- Advanced electronics makes location less time consuming
- Variable audio tone indicates presence of buried object
- Angle and height of search head fully adjustable
- Waterproof search head allows use in shallow water
- Light and unique folding design for easy storage
